

SuperGen to Webcast March 2 Analysts and Investor Day

DUBLIN, Calif., March 1 /PRNewswire-FirstCall/ -- SuperGen Inc. (Nasdaq: SUPG) today announced that it will Webcast its Analyst and Investor Day presentations beginning noon EST on Friday, March 2, 2007, from Salt Lake City, Utah. The presentations will include corporate and scientific updates with specifics on several drug discovery programs.

One update will focus on MP470, SuperGen's multi-targeted tyrosine kinase inhibitor, and its suppression of RAD51 expression. This interaction will be the subject of an upcoming poster presentation at the American Association for Cancer Research annual meeting April 14-18 in Los Angeles.

The company will also review its progress with the JAK2 tyrosine kinase inhibitor program. This program exemplifies the efficiency and productivity of SuperGen's drug discovery platform through an accelerated timeline from concept to pre-clinical candidate development in only nine months.

In addition, SuperGen will provide a detailed presentation of its CLIMB™ technology platform, which enables the company to discover and advance drug candidates rapidly while minimizing the financial risk inherent in traditional discovery efforts.

The presentations will be Webcast by CCBN and can be accessed in the Investor Relations section of SuperGen's Web site at www.supergen.com. A replay will be available in the same location for 90 days following the event.

About SuperGen

Based in Dublin, Calif., SuperGen is a pharmaceutical company dedicated to the discovery, acquisition, rapid development and commercialization of therapies for solid tumors and hematological malignancies. SuperGen is developing a number of therapeutic anticancer products focused on inhibitors of aurora-A, tyrosine kinase and DNA methyltransferase.
